## Progressive Web App

These checks validate the aspects of a Progressive Web App, as specified by the baseline [PWA Checklist](#).

1	Page load is not fast enough on 3G	Interactive at 14 s ▲ ▼
	Your page loads too slowly and is not interactive within 10 seconds. Look at the opportunities and diagnostics in the "Performance" section to learn how to improve.	
2	Does not respond with a 200 when offline	▲ ▼
3	User will not be prompted to Install the Web App	▲ ▼
	Failures: No manifest was fetched, Site does not register a service worker.	
4	Does not register a service worker	▲ ▼
5	Is not configured for a custom splash screen	▲ ▼
	Failures: No manifest was fetched.	
6	Address bar does not match brand colors	▲ ▼
	Failures: No manifest was fetched, No ` <meta &gt;`="" found.<="" name="theme-color" tag="" td=""/>	
🔍	Additional items to manually check	3 audits ▼
✓	Passed audits	5 audits ▼
⊖	Not applicable	1 audits ▼

## Accessibility

These checks highlight opportunities to [improve the accessibility of your web app](#). Only a subset of accessibility issues can be automatically detected so manual testing is also encouraged.

### Elements Use Attributes Correctly

These are opportunities to improve the configuration of your HTML elements.

1	Image elements do not have [ alt ] attributes	▲ ▼
---	---	-----

### Elements Have Discernible Names

These are opportunities to improve the semantics of the controls in your application. This may enhance the experience for users of assistive technology, like a screen reader.

1	Links do not have a discernible name	▲ ▼
---	--------------------------------------	-----

### Elements Describe Contents Well

These are opportunities to make your content easier to understand for a user of assistive technology, like a screen reader.

1	<frame> or <iframe> elements do not have a title	▲ ▼
---	--	-----

### Elements Are Well Structured

These are opportunities to make sure your HTML is appropriately structured.

1	Lists do not contain only <li> elements and script supporting elements (<script> and <template>).	▲ ▼
---	---	-----

### Page Specifies Valid Language

These are opportunities to improve the interpretation of your content by users in different locales.

1	<html> element does not have a [ lang ] attribute	▲ ▼
---	---	-----
